Anubhab Dey

Software Engineer | Backend systems & infrastructure | github.com/Anubhab-Dey

PROFILE

Software engineer with 2+ years of experience building and operating production backends, real-time EV charging systems, APIs and Linux infrastructure. Focused on Python/FastAPI, Go, WebSockets/OCPP, SQL, deployment and production troubleshooting.

CORE SKILLS

Languages: Python, Go, SQL | **Backend:** FastAPI, REST/OpenAPI, WebSockets, OCPP, CLI automation

Data: MySQL, SQLite, ClickHouse, Pandas | **Operations:** Linux, Docker, systemd, Caddy, Git, networking

Enterprise IT: Microsoft Entra ID, Microsoft 365, device policies, configuration management

EXPERIENCE

Backend Software Development Engineer

Transmogrify Global Private Limited | Kolkata, India | Jul 2024 - Present

- Built and operated production EV charging backend services, including OCPP over WebSockets for charger command/control and live status.
- Developed Python/FastAPI and Go APIs and workflows with asynchronous processing, persistence, migrations and CMS integration.
- Deployed and maintained Linux VPS infrastructure with Docker/systemd and reverse proxying; supported releases and production incident investigation.
- Designed charger-event storage, status tracking, analytics and charging-session workflows for live operations and reporting.
- Built backend foundations across multiple product domains, including ERP-style and recruitment-oriented systems.
- Supported enterprise IT: Microsoft Entra ID, Microsoft 365 and device administration.

Intern Backend Developer

Sunyata OÜ | Tallinn, Estonia | Nov - Dec 2023

- Created Python workflows for acquiring, cleaning and storing API/web data, using Requests and BeautifulSoup.
- Developed Typer command-line tools and FastAPI services with structured error handling.
- Worked with Docker, ClickHouse, ORMs and object-storage buckets for containerized APIs and data services.

EDUCATION

B.Tech, Computer Science and Systems Engineering | KIIT, Bhubaneswar | Aug 2023 | CGPA 7.88/10
